SafeEx established
Since 2008 we have been committed to providing our clients with the best solution for Ex inspections and maintenance procedures in Oil & gas.

1st digital solution
released for zone 1 PDAs
Proof of concept

1st orders signed
FPSO Peregrino, 5 years contract in Brazil. Inoes Ex maintenance contract (ongoing since)

2nd software generation for tablets
Second software generation released and SafeEx was founded as a separate software company
Proof of business

Seadrill projects
12 Seadrill projects.
First onshore project – Irish distillery

3rd Software generation
Capable of handling all type of maintenance

TotalEnergies, UK
After 4 years, TotalEnergies UK approves SafeEx for use on all UK assets with a 5-year maintenance contract via PBS Group.
Proof of scale

Inpex, Australia
Maintenance contract with the world's largest LNG project "Ichthys" handling Ex equipment on all assets offshore & onshore .

One Stop Solution
Launch of SaafeEx CaaS [Compliance as a Service]
SafeEx Cloud Gen 4
Launch of the 4th generation, a modern multi-flexible inspection & maintenance software, handling all maintenance routines (2025).

Value proposition

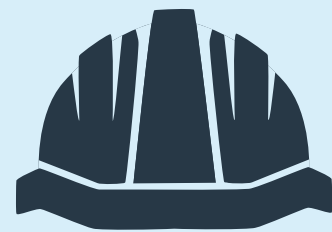

SafeEx has since 2008 served our clients with one of the best Ex inspection & maintenance management solutions primarily in the oil and gas industry.

We have the vision to help our clients with the best Maintenance One Stop Solution worldwide.

Simplify your Maintenance

We simplify inspections and maintenance procedures. We are committed to providing our clients with a solid solution that helps them reach their current and future goals.

Building a safer tomorrow

We believe that SafeEx Cloud is much more than a solution. We have the vision to building a safer tomorrow and **optimise the work environment** for maintenance inspectors, supervisors and certified technicians worldwide.

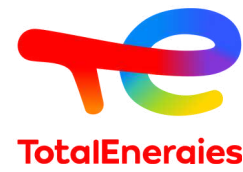

One Stop Solution [Plug & play]

With the knowledge, experiences and effort since 2008, SafeEx takes the hassle out of maintenance and inspection processes with **a complete solution for effortless compliance** and optimized operations.

SafeEx Clients

[Worldwide]

Testimonials

[SafeEx Clients]

“We estimate the digital toolkit can save more than **\$10,000,000** annually”

Troels Albrechtsen, TotalEnergies
Technical Operation Support

“We believe their Ex knowledge & software led to a higher safety standard”

Henrik Arildsen, Ineos

“By far the best EHA system in the world - When others are talking SafeEx is doing it”

Keith Sinfield, Modec
Technical Operation Support

PETRONAS

“SafeEx not only reduces the use of man-hours but also improves safety by providing a full and easy overview of the condition of our Ex equipment”

Mr. Aung Soe Min,
Integrity & engineering department, Petronas

“We have found the solution to be reliable, intuitive and extremely effective, especially since it works offline as many areas do not have Wi-Fi connectivity.”

Serica Energy

Inspections made easy

[Compliance, Safety & Efficiency]

Optimize

less working hours

SafeEx

[SafeEx Cloud - Inspection Software]

Digitize your inspections

Streamline inspection processes

Leveraging technology for efficiency, competitive advantage and maximum safety.

Ensure Compliance

Avoid undue delays. Realtime data ensures overview of compliance status.

Instant and precise Reporting

Get accurate reports instantly, making it easy to identify issues and take action promptly.

Improve data quality

Optimizing financial performance, budgeting, and forecasting.

Easy connect with API

Use the SafeEx REST API to connect your other systems.

Reduce CAPEX and OPEX

Save costs by optimizing resources and streamlining operations, cutting both upfront and ongoing expenses.

SafeEx Cloud in action

[Technical features]

Connect with your software

Start saving time and get instant updates on all inspection and maintenance activities performed on equipment.

Use the SafeEx REST API to connect your other systems.

Operates on android
SafeEx App currently operates on the android operating system

Connected systems
Easy connect and integrate all your systems with SafeEx REST API

Cloud-based
SafeEx runs on a cloud-based infrastructure hosted on **ISO 27001** certified data centres

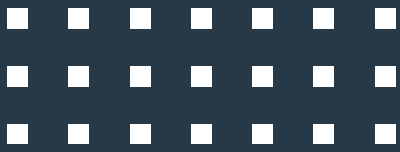

Data migration
Migrate data yourself, with our assistance or leave it all to us

Information security
We take it seriously! Our business is built on this promise

Work offline
SafeEx Cloud can also be used offline anytime & anywhere

Case Studies

[How our clients have improved their workflow with Ex inspections]

Case Study

This case study looks into successfully implementing the SafeEx Cloud software solution to improve the efficiency and credibility of Ex maintenance operations of Serica Energy, a significant player in the Oil and Gas industry.

SafeEx Cloud implementation was successful and completed in a short amount of time. As a result, Serica Energy experienced improved efficiency, accuracy, and proof of integrity in its maintenance operations.

Challenges

- Inefficient manual processes
- Inaccuracies and data loss risks
- Lack of digital records and synchronicity of maintenance results
- Ineffective processes & maintenance

Results

- ✓ Eliminated paper-based processes
- ✓ Able to capture and record data on the field
- ✓ Reduced overall work burden
- ✓ Saved costs on paper, printing, storing and personnel mobilisation
- ✓ Quickly generate high-integrity reports

"Members of the SafeEx team are always available and helpful, respond promptly to queries, and are open to discussing improvements. All our objectives were met."

- SWORD -

Case Study

Haztech Solutions is one of SafeEx partners in Australia. The company provides services in Electrical & Instrumentation, Hazardous Areas (EEHA) and Industrial Rope Access in Australia.

Haztech Solutions conducted a study to evaluate the results of implementing the SafeEx Cloud inspection software on a floating production storage and offloading (FPSO) facility owned by one of Australia's largest resource companies.

Challenges

- Too many manual functions
- Problems with sharing knowledge
- Long and slow reporting process
- Ineffective in the field
- High OPEX costs

Results

- ✓ Reduced yearly costs by up to 45%
- ✓ Reduced on-site -man-days by up to 50%
- ✓ Faster and higher quality reporting
- ✓ Saved costs on paper, printing, storing and personnel mobilisation
- ✓ Doubled the output from averagely 15 to 30 inspections per day

"Yes I confirm we have doubled the output to averagely 30 inspections (up from 15) per day."

Lee Hughes, Former Managing Director, Haztech Solutions

One Stop Solution

[All products & services for Ex inspections]

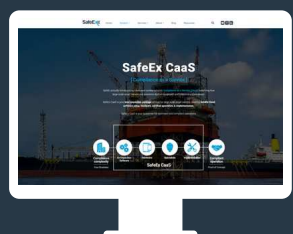

SafeEx CaaS [Compliance as a Service]

One Stop Solution

SafeEx introduces **Compliance as a Service (CaaS)**, a complete solution for digitizing equipment and maintenance for large-scale asset owners.

SafeEx CaaS is your total inspection package tailored for large-scale asset owners, covering software, hardware, manpower, and related services.
